

Vocallabs Operational Response & Strategy (Q1, Q2, Q3)

Question 1: 48-Hour Key Client Crisis Protocol

PHASE	TIMELINE	TELEMETRY & TECHNICAL ACTIONS	EXECUTIVE SLA
Phase 1	Hours 00 - 02	Audit VocalStack logs over 30 days. Isolate STT Word Error Rate (WER), LLM tool latency, SIP packet loss.	120-min C-suite SLA memo sent to Client VP Ops.
Phase 2	Hours 02 - 12	Fine-tune STT acoustic dictionary with 200+ domain terms. Prune prompts to <400ms latency. Deploy SIP trunk failover.	Solutions Engineer & AI Voice Architect war room.
Phase 3	Hours 12 - 24	Structure 30-Day Performance Guarantee (50% credit on infra fees if metrics miss 25% target in 14 days).	Brief Co-Founders (Mritunjoy/Rag/Nileesh).
Phase 4	Hours 24 - 48	C-suite summit with client VP Ops. Present transparent telemetry & live sub-400ms audio comparison.	Establish weekly joint steering committee & lock renewal.

Question 2: INR 1 Crore Capital Deployment Matrix

PILLAR	AMOUNT	SHARE	STRATEGIC TARGET
Partner Acquisition Engine	INR 40,00,000	40%	B2B outbound engine & funding first 10k partner call mins
Developer & OS Ecosystem	INR 35,00,000	35%	VocalFlow OS & PocoDisk OS grants + production MCP Servers
Global Telephony & Infra	INR 15,00,000	15%	Multi-region edge nodes (Mumbai, US, EU) & SIP trunk failover
Founder's Office Reserve	INR 10,00,000	10%	Key account turnaround credits & quick micro-experiments

Question 3: Candidate Positioning & 10/10 Match

- **Mritunjoy's 'Ours Ship' Alignment:** Built code, presentations, strategy docs, and video scripts - zero 3-month deck fluff.
- **Technical & Business Dual-Threat:** Bridges audio pipeline telemetry (sub-400ms latency) with BPO gross-margin arbitrage.
- **Dogfooding Meta-Signal:** Recognized Hiringg (app.hiringg.ai) as Vocallabs' internal AI candidate platform.
